MPROVED BRUSH GIN. Those make a sample equal to the best Gins made at any other Fuetory are unsurpassed in speed and durability—require as little power as any other Gins, and, by the insertments in the Brush, are free from all danger of taking fire. They are made with great care, and have given general satisfaction to all who have tried them. The Gins of no Factory have a higher reputation, as far as they are known.

The Patent Steel Comb Brush.

This is the greatest improvement ever yet made upon the Cotton Gin. This Gin, after repeated experiments and improvements, has been brought to a state of perfection, leaving it without a rivel in sample, speed, or durability. The certificates below are from the most competent judges in the country. Messrs, Monney, Buaterone, Journax, Kirin, and Jossis.

The certificates below are from the most configurations. Since these Gins were made, other improvements have been made. The wire brush has been substituted by the Steel Cook Brook, which he overy respect, is superior to the former, being of speat strength, free from any vibration, and affording any amount of blast desired. These Gins differ from the common Gin, in having two small Moting Brushes between the saws and the Steel Comb Brush. Their asperiority over all other Ginz consists in their superior moting power, in opening up and straightening the lint, giving it a carded appearance and an elasticity that no other Gin can; thus preparing it better, and making it worth more to the manufacture than that ginned upon any other Gin. The boar, judges, as the certificates show, price the cotton at a cent more than the same quality of cotton ginned upon any other Gin—being equal to Five Bollars per balo. Since the last improvements, there is nothing about them resolving them more liable to get out of order than the common Gin. The two small Brushes never have been liable to get out of order than the function of the principal Brush—the wire Brush—reinfers that as little if not less hable to get out of order than the Brush of the common Gin. We feell confident that these Gins must soon supplies all others. Those who have given theory fair trial flooks it bad concay to use any other, if given to them. Every Gin will be made with the unions care, and tried better it leaves the Factory. No tim will be sent to any one upon trial, and no retard will be paid to any order, unless positive. But severy Gin sent from the Factory will be carrended to be as zood as those for which certificates. have been given. If upon a fair trial, anything should prove defective on our part, it will be remedied as soon as practicable. Would have him do unto thee.

W. E. love our friends, respect our enemies, and feel exceedingly thankful, for the liberal patronage extended to us by this community. And it is very unpleasant to us, to be forced to remind our friends of the small accounts which they owe us, but necessity knows no law, much less a common observance of etiquette.

All persons therefore indebted in any way, either by note or account to the undersigned, will please call forthwith and seitle, and save us the pain and trouble of rescring to harsh means. We have made a change in our businers by associating with us, Mr. F. G. Henly, and in consequence it becomes imperatively our duty to close all old matters. LEEDY & KIDD.
